SUBJECT INDEX

ABH precursor chains, fucosylation of 235
ABO antibodies, serological behaviour and immuno-chemical characterization 279
Acute lymphoid blasts, altered expression of HLA-A,B specificities 161
Agouti locus in the rat, linkage of neutrophil response to a mutagen gene (*Nrm-1*) 1
Allelic exclusion, breakdown of in V_HDJ_H to J_H joining 395
Anti-class I-like ailoantisera, immunoprecipitation of HLA molecules 409
Anti-IgG monoclonal antibodies 331
Antigen variants of Mta, mouse maternally transmitted antigen 29
Antigens
  carbohydrate blood group, genetic studies 259
  class I, novel 9
  Genetic analysis of antigens defined at the Third International *BoLA* workshop 21
  HLA 51, 101, 161, 189, 195, 371, 379, 387, 409
  rhesus blood group 227

Blood banks, future of 343
BoLA workshop, genetic analysis of the antigens defined at the Third International Workshop 21
Book reviews
  Bacterial Immunoglobulin-Binding Proteins: Microbiology, Chemistry and Biology (Boule) 208
  Complement (Law & Reid) 207
  Medical Genetics (Read) 415
  The SCID Mouse. Characterization and Potential Uses. Current Topics in Microbiology and Immunology (Bosma, Phillips & Schuler) 209
  Tissue Specific Gene Expression (Renkawitz) 207

Class I antigens, novel, influence of recombinant interleukin-2 and α- and γ-interferons on the induction of 9
Coelic disease 195
Complement components, monoclonal antibodies to 337
Complotypes 195

Dermatitis Herpetiformis, juvenile 195
Diabetes mellitus, insulin-dependent
  evidence of non-HLA gene involvement 379
DNA-binding protein, identification of 67
DR3-related haplotypes, extended, no involvement in Graves' disease 403

Eα recombination hot spot, crossovers in 169
Epistatic interactions, evidence of 235
Extrachromosomal gene *Mtf* 29

Fucosylation, genetic control, of ABH precursor chains 235

Genetic analysis, of the antigens defined at the Third International *BoLA* workshop 21
Glycophorins, monoclonal antibodies against 301
Glycoproteins
  monoclonal antibodies against 301
  human red cell surface, nature and abundance 219
Graft versus host disease, protection from in newborn mice 77
Graves' disease 403

H-2 class I molecules, expressed on the UV-induced tumour 1591 177

H-2Kl^k gene, inactivation of 133
HLA in Juvenile Dermatitis Herpetiformis 195
HLA molecules
  immunoprecipitated by putative anti-class I-like alloantisera 409
  isoelectric focusing 409
  soluble, characterization in sweat 387
HLA A1 B8 DR3, normal, increased interleukin-2 affinity 371
HLA-B8, DR3, phenotype and lymphocyte responses to phytohaemagglutinin 101
HLA-DR antigens and islet-cell antibodies in secondary diabetes 189
HLA-DRα gene, methylation pattern in human tissues 51
Hybridomas and T-cell lines, human thyroglobulin-reactive 361

I-A^k_α, expression of in transgenic mice 151
IgA, human, post-translational polymorphism 43
Immuno-chemical characterization, of ABO antibodies 279
Immunogenetics, of human thyroglobulin 361
Insulin-dependent diabetes mellitus
  secondary to chronic pancreatitis 189
  evidence for involvement of non-HLA genes 379
Interferons, α and γ, recombinant, influence on the induction of novel class I antigens 9
Interleukin-2 and α- and γ-interferons, recombinant, influence on the induction of novel class I antigens 9
Interleukin-2 receptor affinity, increase in normal HLA A1 B8 DR3 subjects 371
Isoelectric focusing, of HLA molecules 409

Juvenile Dermatitis Herpetiformis, HLA in 195

Leishmania mexicana infection in mice 89
Lymphocyte responses to phytohaemmagglutinin, and HLA-B8m DR3 phenotype 101
Lymphoid cell lines, immature, identification of DNA-binding proteins 67

MHC ancestral haplotypes, associated with insulin-dependent diabetes mellitus 379
MHC class I antigens, rat, RT1.A, RT1.F and Pa 109
MHC class II genes, expression by rabbit MHC IV 123
Molecular characterization of the *H-2Kl*^{k} gene 133
Monoclonal antibodies
  against complement components 337
  against human red blood cells and related antigens 213
  against glycophorins and glycoproteins 301
  against rhesus and rhesus-related antigens 309
  anti-IgC 331
  as tools in genetic studies 259
  future of workshops and blood banks 343
  human rhesus, functional activity of 321
workshop, participating laboratories 355
Mtf, three alleles of the extrachromosomal gene 29
Myeloid leukaemia blasts, altered expression of HLA-A,B specificities 161

Neutrophil response, linkage to a mutagen gene (*Nrm-1*) to the agouti locus in the rat 1
Newborn mice, protection from graft versus host disease 77

Pa, biochemical analysis 109
Participating laboratories, in workshop 355
Phytohaemagglutinin, HLA-B8, DR3 phenotype and lymphocyte responses to 101

Rabbit MHC IV, expression of MHC class II genes 123

Recombinational signal sequence-specific DNA-binding protein(s) 67
Red cell surface glycoproteins, human, nature and abundance 219
Rhesus and rhesus-related antigens, monoclonal antibodies against 309
Rhesus blood group antigens, biochemistry 227
Rhesus determinants, serologically defined 247
Rhesus monoclonal antibodies, human, functional activity of 321
RT1.A, biochemical analysis of 109
RT1.F, biochemical analysis of 109

Secondary diabetes, non-association with HLA or occurrence of islet-cell antibodies 189

Thyroglobulin, human, immunogenetics of 361
Transgenic mice, expression of I-A^k_α and allelic restriction on A_α/A_β pairing 151
Tumour 1591, analysis of H-2 class I molecules 177

V_HDJ_H to J_H joining, not blocked in μ chain-producing pre-B cells 395

Workshops
Second International on Monoclonal Antibodies against Human Red Blood Cells and Related Antigens 279
Third International *BoLa* 21
